PROFILE SUMMARY

Self-taught Full Stack Developer with practical experience building real-world web applications. Comfortable across the stack and quick to pick up new tools as needed.

PROJECTS

Laptop Store - E-Commerce Web Application

[GitHub Link](#)

— [Live Site](#)

Developed an advanced e-commerce platform featuring RESTful API-based services and user-friendly functionalities like OTP-based authentication, social media login, and dynamic product management.

- **Business Logic & Recovery:** Stock-aware cart management, conditional COD based on price thresholds, failed payment recovery system from order history
- **Analytics Dashboard:** Real-time charts for top-selling products/categories/brands, sales reports with PDF export and custom date range filtering
- **Advanced Features:** Image cropping/resizing with validation, real-time inventory synchronization, automated order workflow with status transitions
- **Payment & Security:** Razorpay integration with comprehensive error handling, OTP validation system, multi-address management
- **Admin Operations:** User management with block/unblock functionality, offer/coupon modules, referral rewards system with tracking

Dropnest – Full-Stack File Storage

[GitHub Link](#)

— [Live Site](#)

Built a full-stack, Dropbox-style application implementing "Smart Store, Dumb Components" architecture pattern for scalable state management and clean code separation.

- **Advanced UX:** Optimistic UI updates, real-time drag & drop progress tracking, and Global Activity Center for background jobs
- **Performance Optimization:** High-fidelity skeleton loaders preventing layout shifts, efficient search across nested file structures
- **File Operations:** Shareable links generation, bulk operations with multi-select, trash recovery system with soft-delete
- **Serverless Architecture:** Auto-scaling database with pay-as-you-go model, automated demo account reset via Vercel Cron Jobs
- **Tech Stack:** Next.js (App Router), TypeScript, PostgreSQL, Drizzle ORM, Zustand, Clerk

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Node.js

Frontend Development: Next.js (App Router), React, Tailwind CSS, Zustand, Framer Motion

Backend Development: Express.js, NestJS, Authentication (Clerk, JWT), REST APIs

Databases & ORMs: PostgreSQL, MongoDB, Drizzle ORM, Mongoose

APIs & Integrations: Razorpay (Payments), ImageKit, Cloudinary (Media)

Cloud & DevOps: AWS EC2, Nginx, Git, CI/CD, Vercel, Cron Jobs

EDUCATION

Secondary Education in Computer Science

2021 - 2023

Full-Stack Web Development Bootcamp - Brototype

2024 - 2025
