PROFILE SUMMARY

Self-taught Full Stack Developer with practical experience building real-world web applications. Comfortable across the stack and quick to pick up new tools as needed. Committed to delivering results in a professional role.

PROJECTS

Laptop Store - E-Commerce Web Application

 [GitHub](#)  [Live Link](#)

Developed an **advanced e-commerce platform** featuring RESTful API-based services and user-friendly functionalities like OTP-based authentication, social media login, and dynamic product management.

- **Dynamic Features:** Image cropping/resizing, advanced filtering/sorting, and **real-time stock updates**.
- **Admin Panel:** Comprehensive **user, product, and category management** with detailed **sales reports**.
- **Payment Integration:** **Razorpay gateway** and **error handling for failed payments**.
- **Referral System:** Fully implemented user **referral rewards** program.

Dropnest – File Storage Platform (In Progress)

 [GitHub](#)

Building a full stack Dropbox-inspired platform using modern backend architecture and secure authentication.

- **Tech Stack:** Next.js (UI), NestJS (Backend), PostgreSQL, Drizzle ORM, Clerk (Auth).
- **Auth System:** JWT-secured routes and session handling using Clerk.
- **File Features:** Folder and file creation, upload, listing, and cloud storage integration.
- **Architecture:** Modular backend built with NestJS and type-safe Drizzle ORM.

Technical Website Audit (7-day Assessment Task)

 **June 2025**

Completed a 7-day professional audit for multiple live business websites (WordPress + custom-built). Delivered a structured report covering SEO, speed, UX, and performance fixes.

MINI PROJECTS

Cloned **Netflix** and **SpaceX** websites using HTML, CSS, JavaScript
