PROFILE SUMMARY

Self-taught Full Stack Developer with practical experience building real-world web applications. Comfortable across the stack and quick to pick up new tools as needed.

PROJECTS

Laptop Store - E-Commerce Web Application**GitHub Link** — **Live Site**

Developed an advanced e-commerce platform with separate user and admin interfaces, featuring OTP-based authentication, social media login, and dynamic product management.

- **Business Logic & Recovery:** Stock-aware cart management, conditional COD based on price thresholds, failed payment recovery system from order history
- **Analytics Dashboard:** Real-time charts for top-selling products, categories, and brands, sales reports with PDF export and custom date range filtering
- **Advanced Features:** Image cropping and resizing with validation, inventory checks against live stock on page load, automated order workflow with status transitions
- **Payment & Security:** Razorpay integration with comprehensive error handling, OTP validation system, multi-address management
- **Admin Operations:** User management with block and unblock functionality, offer and coupon modules, referral rewards system with tracking

Social Media Core - Full-Stack Social Platform**GitHub Link** — **Live Site**

Built a full-stack social media application with real-time messaging, content sharing, and social interaction features.

- **Real-Time Chat:** One-to-one messaging with Socket.io, live online and offline presence indicators
- **Content & Engagement:** Post creation with image uploads, like and comment system, short-form video reels with swipe navigation
- **Social Graph:** Follow and unfollow system, followers and following lists, user search and discovery
- **Media Handling:** Image uploads and storage via Cloudinary
