PROFILE SUMMARY

Self-taught Full Stack Developer with practical experience building real-world web applications. Comfortable across the stack and quick to pick up new tools as needed.

PROJECTS

Laptop Store - E-Commerce Web Application

 [GitHub Link](#)

—  [Live Site](#)

Developed an advanced e-commerce platform featuring user-friendly functionalities like OTP-based authentication, social media login, and dynamic product management.

- **Business Logic & Recovery:** Stock-aware cart management, conditional COD based on price thresholds, failed payment recovery system from order history
- **Analytics Dashboard:** Real-time charts for top-selling products/categories/brands, sales reports with PDF export and custom date range filtering
- **Advanced Features:** Image cropping/resizing with validation, real-time inventory synchronization, automated order workflow with status transitions
- **Payment & Security:** Razorpay integration with comprehensive error handling, OTP validation system, multi-address management
- **Admin Operations:** User management with block/unblock functionality, offer/coupon modules, referral rewards system with tracking
